

DIGITAL DUAL ELEMENT PYROS FOR MOTION SENSING

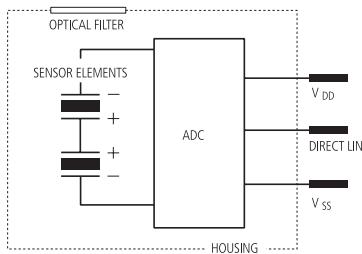

PYD 1788, PYD 1798 – DigiPyro®

Applications

- Passive intrusion alarm
- Auto light switch
- Auto lamps

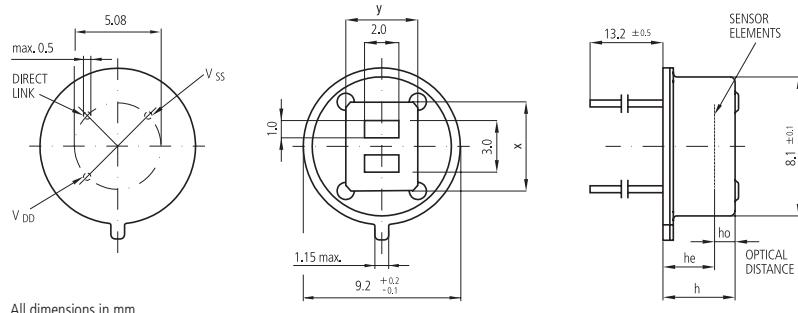

Features and Benefits

- TO-5 metal housing
- Digital direct link
- Different window sizes
- Excellent EMI protection

Product Description

The DigiPyro® detector range in TO-5 housing includes 3 variations of Dual Element types, each with a different window size. The element configurations are identical, as well as the internal electronic circuits. Whereas the PYD 1778 represents the lower-cost version with a small window, the PYD 1798 is provided as the superior type in terms of White Light Immunity (WLI) performance and field of view. The output signals are communicated in one 15-bit digital bit stream output via a single wire “direct link” connection to a suitable host microprocessor.
