

PRODUCT EOL NOTICE #151112

Date:

November 11, 2015

Product:

XBee-PRO 900 (S4) Modules, Adapters, Gateways

Notice:

Effective November 11, 2015, Digi will begin the EOL process for all XBee-PRO 900 (S4) Modules, Adapters, and Gateways. This EOL is due to the market obsolescence of multiple critical components used in these products. To assist our valued customers, we will provide a migration path for these products that offers improved performance specifications. Note this migration option will not be over-the-air compatible with the XBee-PRO 900 (S4) products. More details on this are noted below.

All affected part numbers are listed in the table below for reference, along with part numbers recommended for migration. Free samples will be provided upon request.

All **last time buy** orders for all existing XBee-PRO 900 (S4) part numbers must be placed by **January 18, 2016** and all orders will be non-cancellable and non-returnable (NCNR). The **last time ship** date for all orders will be **April 18, 2016**. Please work with your local sales representative to schedule your last time buy orders as soon as possible.

Last Time Buy (LTB) – January 18, 2016

Last Time Ship (LTS) – April 18, 2016

Recommendation:

Digi recommends the XBee-PRO 900HP Modules, Modems, and Gateways as the optimal migration path for current customers. These products offer improved performance characteristics and pin-compatibility at the modular level, although they are not over-the-air compatible with the XBee-PRO 900 S4-based products.

EOL Part Numbers and Suggested Migration:

*If marked N/A, there are no plans to release a direct replacement for that part

EOL Part Number	EOL Part Description	Replacement Part Number	Replacement Description
XBP09-DMDK	XBee-PRO DigiMesh 900 Dev Kit	XKP9-DM-0	XBee-PRO 900HP S3B Dev Kit (Domestic)
